| NWS FORM E-5 COMMERCE | U.S. DEPARTMENT OF NOAA, NATIONAL WEATHER | HSA OFFICE: San Juan, PR (SJU) |
| SERVICE | | REPORT FOR (MONTH / YEAR): December, 2005 |
| MONTHLY REPORT OF RIVER AND FLOOD CONDITIONS | | DATE: January 12, 2005 |
| TO: NATIONAL WEATHER SERVICE HYDROMETEOROLOGICAL INFO CENTER, W/OS31 SSMC 2 – Room 13468 1325 EAST-WEST HIGHWAY SILVER SPRING, MD 20910-3283 | | SIGNATURE: Althea Austin-Smith |
| When no flooding occurs, include miscellaneous river conditions, such as significant rises, record low stages, ice conditions, snow cover, droughts, and hydrologic products issued (WSOM E-41). | | |

Summary: The rainfall for the month of December was less than normal for both San Juan, PR and the Truman Field in St. Thomas. The San Juan ASOS reported 3.76 inches for the month of December, 0.81 inches less than the normal of 4.57 inches. At the Truman Field in St. Thomas, the reported amount was 2.01 inches which was 0.73 inches less than their normal of 2.74 inches.

With these low rainfall amounts, not much hydrologic activity was experienced during the month of December. The only noteworthy activity was from some isolated and very localized showers at the beginning of December.

The only non-routine Hydrologic Products issued were Urban/Small Stream Flood Advisories. At the beginning of the month, the advisories were issued both in Puerto Rico and the Virgin islands as a result of the remnants of a weak baroclinic zone that dropped southeast and interacted with some shallow moisture across the region. No flooding was reported at the NWS forecast locations throughout the month of December since the weather remained relatively "quiet".

| Non-Routine Hydrologic Products Issued: | Number of Products for the month |
|---|----------------------------------|
| Hydrologic Outlooks (SJUESFSJU) | 0 |
| Flood Watches (SJUFFASJU) | 0 |
| Flood Warnings (SJUFLWSJU) | 0 |
| Flash Flood Warnings (SJUFFWSJU) | 0 |
| Urban/Small Stream Flood Advisories (SJUFLSSJU) | 4 |
